Multi-format Publishing

Automatically link to other formats in HTML documents

> This post is part of a series highlighting new features in the 1.3 release of Quarto. Get the latest release at https://quarto.org/docs/download.

Starting in Quarto 1.3, HTML pages (either standalone or in a website) can automatically include links to other formats specified in the document front matter. For example, the following document front matter:

```
title: Sample Page
author: Norah Jones
date: last-modified
toc: true
format:
  html: default
  ipynb: default
```

Results in an HTML page that includes a link to the additional notebook format in the right margin below the table of contents:

Sample Page

AUTHOR
Norah Jones

PUBLISHED
January 9, 2023

Welcome

Donec ac nulla quis elit consectetur mattis. Donec quis neque nibh. Vivamus et porttitor sem. Etiam ligula libero, aliquet vel justo eget, lobortis dignissim neque. Sed semper tortor sem, ac

If a table of contents is enabled for the page, the additional formats will be automatically placed within the table of contents as a new section. If no table of contents is displayed, the additional formats will be displayed in the right margin at the top of the document.

Links to additional formats are displayed by default, but you can control whether they are shown or even which specific formats are included with the `format-links` YAML option.

Read more about this feature on the Multi-format page of the pre-release highlights.

Plot

```python
import matplotlib.pyplot as plt
plt.plot([1,23,2,4])
plt.show()
```
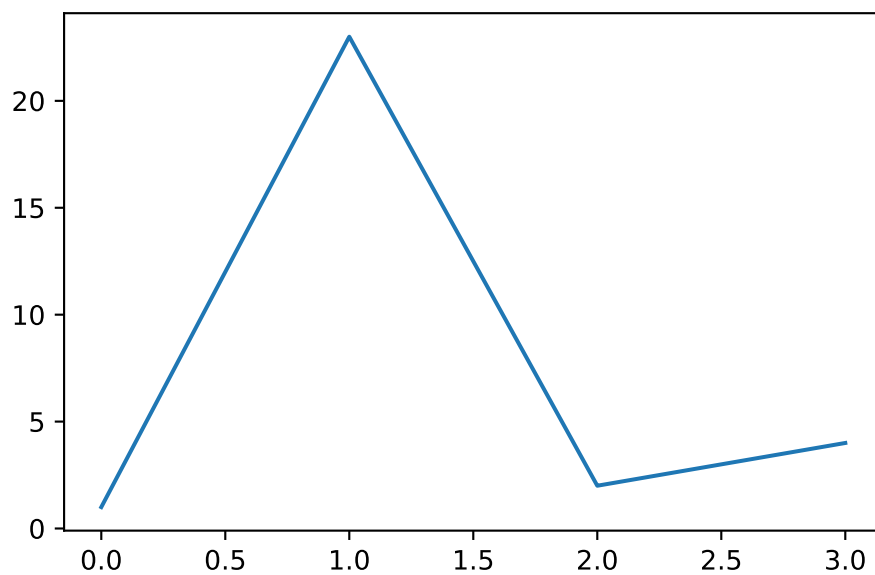

Figure 1: Simple Plot

Equation

$$s = \sqrt{\frac{1}{N-1}\sum_{i=1}^{N}(x_i - \overline{x})^2} \qquad (1)$$
